Objectives	<p>Customs and rituals capture the ways human beings interact with each other. In the case of rites of passage and seasonal observances, they reveal human beings' perceptions of their positions vis-a-vis the larger life-cycle observable in nature. Even though they vary across time and space, customs and rituals perform a cohesive social function that brings together people living in areas that have come under the influence of the same culture. This subject will introduce students to the differences in customs and rituals in the major geographical regions and dialect communities in China, document the process of their transformation over time and space, and relate them to Chinese religious beliefs and cultural values. Students will thereby come to appreciate the practices and significance of these social gestures that form part of their daily life. This subject will include substantial reading and writing assignments for the fulfillment of the Chinese Reading and Writing Requirements in Chinese session.</p>
